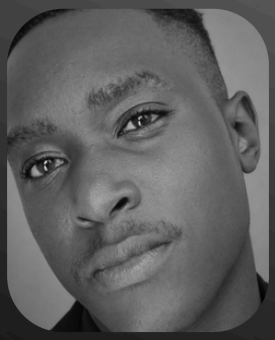
Emmanuel Kenyani



JunioftwareDeveloper
Nairobi, Kenya

Hello.

I'm a junior software engineer in Nairobi who believes great products come from equal parts curiosity and discipline. Over the past two years I've built full-stack apps with React, Node.js,Python and Firebase .From an AI-assisted rental platform and budgeting dashboard to a QR-based Guard Patrol PWA with offline sync and JWT role separation.

I care about clean architecture, accessible UI, and leaving code better than I found it. Looking for a team where craft and mentorship are the standard — and where I'll grow fast and contribute even faster.

EDUCATION

2023 - 2024 -Zindua school

Diploma - fullstack software developer

CONTACT

+254 705171018

kenyaniemmanuel44@gmail.com

TECH STACK

- React
- JavaScript
- TypeScript
- Node.js
- Python
- Django
- Flask
- Tailwind CSS
- Firebase
- REST APIs
- SQLite
- Git / GitHub
- Postgresql

AWARDS

- **Top Project** — ***Zindua Demo Day***
- **Hackathon Finalist** — *Nairobi Devs*

HOBBIES

I spend my weekends shipping side projects, reading about systems design, watching football, and exploring AI tooling.

EXPERIENCE

VIEW PORTFOLIO

Smart Budget Dashboard

2024

A single visual hub that categorizes spending, tracks goals, and gives financial clarity using a modern dashboard interface.

Visit site

House Hunter

2025

A web app connecting tenants and landlords, allowing landlords to post houses with specifications and tenants to view listings and comment

Visit site

Patrol-scan

2026

A modern patrol management system with QR-based guard tracking, real-time reports, offline PWA support, and role-based access.

Visit site

VIsitor management system

2026

Developed a Visitor Management System that replaces paper reception logbooks with a real-time digital check-in platform. Visitors check in via a guided form and staff are instantly alerted through push notifications, email and SMS. Built with Django, React, Firebase and PostgreSQL. Deployed to production on Render.
